★★★★★
Color:130X Small Base Magnification:4K 48MP IMX327 HDMI Ships From:China Mainland

With so many confusingly similar options available, i chose this on basis of the imx327 sensor and reports of it being much lower latency and better light tolerance than others. While i don't have other digital microscopes to compare to - it seems very good and has helped me with my hobby...i was able to fix the 0606 component that i was struggling with before!
